MEETING OF THE GOVERNOR AND CABINET AS HEAD OF THE DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES November 14, 2007

CORRECTED AGENDA

Agency Contact: David F. Westberry, (850) 617-3100

1. Respectfully recommend appointment of Dr. Gurusami Lakshmin, Internal Medicine, Tallahassee, for a four-year appointment to the Department of Highway Safety and Motor Vehicles' Medical Advisory Board provided for by Section 322.125(1), Florida Statutes.

Dr. Lakshmin is in good standing with the Florida Medical Association.

Attachment #1.

Recommend.

2. Respectfully recommend a four year extension of the following physicians currently on the Department's Medical Advisory Board.

Dr. Jack B. Shumate, Neurologist, Panama City

Dr. Carl A. Salvati, Neurologist, Delray Beach

Dr. Shumate and Dr. Salvati are in good standing with the Florida Medical Association.

Attachment #2.

Recommend.

3. Respectfully submit the Department's Substantive Legislative Proposal for 2008.

Attachment #3.

Recommend.

4. Respectfully submit the 1st Quarter Performance Report Fiscal Year 2007-2008.

Attachment #4.

Recommend.

5. Respectfully submit the new state of Florida license plate, Trees Are Cool.

Attachment #5.

Gurusami Lakshmin, M.D., F.A.C.P.

3348 Charleston Road Tallahassee, FL 3230 (850) 878-8235 office

Education

1961 to 1968

Jawaharlal Institute for Postgraduate Medical Education and

Research, Pondicherry, University of Madras, India

Graduation included one year of rotating internship in Medicine, Surgery,

Pediatrics and Ob/Gyn

Internship

June 1970 to June 1971

Brooklyn-Cumberland Medical Center, Brooklyn, NY

Straight Medical Internship

Residency

July 1971 to June 1972 First Year Medical Residency Brooklyn-Cumberland Medical Center, Brooklyn, NY

July 1972 to June 1973 Second Year Medical Residency Brooklyn-Cumberland Medical Center, Brooklyn, NY

July 1973 to June 1974 Chief Medical Resident Brooklyn-Cumberland Medical Center, Brooklyn, NY

I served as a consultant in Internal Medicine for patients in the other medical services. I also took classes for medical students and physician associates. I gave bi-weekly lectures to the house staff on various subjects of clinical importance and recent advanced in Internal Medicine. The following are some of the topics on which I gave lectures: Hypoglycemia, Immunoglobulins, Hyperlipoproteinemia, Fever of Unknown Origin, and Antimicrobials.

Fellowship

1991

American College of Physicians

Award Fellowship for maintaining outstanding clinical knowledge and clinical

practice in community

Hospital Staff Membership

August 1991 to Present

Capital Regional Medial Center, Tallahassee, FL

February 1997 to Present

Tallahassee Memorial Hospital

July 2006 to Present

Healthsouth Rehabilitation Hospital, Tallahassee, FL

Professional Experience

August 1991 to Present Internal Medicine

Medical Group of North Florida, Tallahassee, FL

1976 to 1994

Private Practice, Perry, FL

October 1975 to October 1976 Internist Staff Physician cum Trainee

West Roxbury VA Hospital, Boston, MA
Affiliated with Harvard Medical School as an Internist in the Spinal
Cord Injury Services getting hands-on knowledge on other aspects of
SCI management which included autonomic dysreflexia, pulmonary
and cardia hemodynamics, neurology and rehabilitation aspects.

July 1974 to October 1975 Associates Attending-Internal Medicine Greenpoing Hospital, Brooklyn, NY
Affiliated with the Brooklyn Jewish Medical Center. As a full-time
Associate at this hospital, I had direct patient care under the "Home
Care" program. During this time, I gave CC to the medical staff and
residents in one of the weekly conferences.

1968 to 1970 Tutor in Microbiology JIPMER, Pondicherry, India

During this time, I was in charge of Serology and Diagnostic Bacteriology of the Microbiology Lab serving the 400 bed hospital. I also took many classes in Bacteriology, Serology and Parasitology for the 3rd and 4th year medical students. I was actively involved in the following research projects: Bedside Agglutination Test for Salmonellosis, Serological Test for Thyroid Autoantibody, Immunoelectrophoresis, Study on Gentamicin in Urinary Tract Infection, Typing of Pseudomonas Pyocyanin and its Pathologenicity.

Committee Memberships and other Activities

1979 to 2000 Medical Director Perry Health Facility (N.H.), Perry, FL

1980 to 1981 Chief of Medical Staff Doctors Memorial Hospital, Perry, FL

1985 to 1990 Chairperson Respiratory Department Doctor Memorial Hospital, Perry, FL

1985 to 1990 Chairperson The Doctor's Memorial Hospital, Perry, FL Pharmacy/Therapeutic Committee & Infection Control

1988 to 1990 Chairperson The Doctor's Memorial Hospital, Perry, FL Critical Care Committee

1989 to 1990 Chairperson

The Doctor's Memorial Hospital, Perry, FL Q/A Utiliazation Committee

1989 to 1990

Doctor's Memorial Hospital, Perry, FL

Member Executive Committee

1992 to 1996

Member

Tallahassee Community Hospital

Critical Care Committee

1996 to 1997

Member

Tallahassee Community Hospital

Resource Management Committee

1996 to 1997

CEO

Medical Group of North Florida, Tallahassee, FL

1997 to 2001

Member

Tallahassee Community Hospital

Performance Improvement Committeee

1999 to 2000

Pincipal Investigator

Medical Group of North Florida, Tallahassee, FL

Investigator in Clinical Trials

1999 to Present

Mentor for medical students, for shadowing in the office

2002 to 2003

Chairperson

Tallahassee Community Hospital Medical Care Review Committee

2002 to 2003

Member

Tallahassee Community Hospital

Medical Executive Committee

2002 to 2003

Chief of Medical Staff

Tallahassee Community Hospital

Professional Associations

American College of Physicians

Capital Medical Society

Florida Medical Association

Qualifications and Certifications

June 1974 to Present

American Board of Internal Medicine

Recertified in October 1980 having demonstrated continued

scholarship in Internal Medicine

Awards and Recognition

1987 to 1988

Executive Club Award

Taylor Association for Retarded Citizens, Perry, FL

2004

Distinguished Physician Award

Florida Medical Association

National Quality Recognition Award

ATTACHMENT 3

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

SUBSTANTIVE LEGISLATIVE PROPOSAL 2008

Electra Theodorides-Bustle, Executive Director

Issue	Current Situation	Proposed Change	Justification	Fiscal Impact	Statutes to be Amended
Commercial Motor Vehicle Operators	A Federal Motor Carrier Safety Administration review of Florida law pertaining to commercial motor vehicles finds that 49 CFR 383.51 is not adequately addressed in a number of areas.	These changes will create new and specific language addressing commercial motor vehicle operator's responsibilities as it relates to railroad crossings. Amend the statutory definitions for conviction, hazardous materials and out-of-service order. Remove the limitation on disqualifications for specified major offenses to those committed in a commercial motor vehicle.	The department is seeking to remedy the inconsistencies between Florida law and federal motor carrier requirements. Failure to meet these requirements could result in sanctions by the federal government.	A reduction in federal funding for the Department of Transportation could occur should these changes not be enacted.	ss. 316.1575, 316.159, 322.01, 322.61 and 322.64.
Driver License	Driver licenses are issued for 6 and 4 year terms with two convenience renewals permitted between each in-office visit.	The term of a driver license or identification card would be extended to 8 years.	Modifying the term of the driver license will adjust the renewal cycles to better align Florida with the Real ID Act suggestions as well as reduce the number of years between office visits.	A reduction in revenue collections in years seven and eight will occur with this proposal.	ss. 322.051 and 322.18
Seatbelt and Child Restraint Exemptions	At this time, Florida law exempts trucks with a net weight of more than 5,000 pounds from the seat belt provisions. This exemption allows occupants of these vehicles to lawfully ride without using their seatbelt or child restraint devices.	This modification would change the exemption to apply only to vehicles with a gross vehicle weight rating of 26,001 pounds.	The exemption for trucks has been in statute since the seat belt law was first enacted in 1986. At that time trucks driven by the general public were typically less than 5,000 lbs., therefore the exemption targeted what was then considered to be "heavy trucks" used commercially. Since 1986 the purchasing habits of the general public have changed dramatically. Today trucks exceeding the 5,000 pound threshold are commonly promoted in the general population by the vehicle manufacturers and purchases of these types of vehicles have risen dramatically.	None.	ss. 316.613 and 316.614

Issue	Current Situation	Proposed Change	Justification	Fiscal Impact	Statutes to be Amended
Florida Rider Training Program (FRTP)	The Florida Rider Training Program (FRTP) was established in 1989, the intent of the reimbursement process was to support program sponsors in setting up and running their programs until they became self- supporting. The FRTP sponsors charge students to attend their course.	The proposed change would only provide for a reimbursement to sponsors for the first 12 months they are in business.	In the last eighteen years the State has subsidized the motorcycle training industry. Law changes requiring all persons to complete the course will greatly increase the potential customer base for these organizations beginning July 1, 2008.	Currently, these reimbursements total approximately \$500,000 annually. The department is seeking to redirect these funds to create four FTE in this program for monitoring in anticipation of an influx of students and sponsors within the next several months.	s. 322.0255
Arrest Authority	Chapter 316, Florida Statutes, provides authority for law enforcement to make arrest at the scene of a crash for violations of chapters 316 and 322.	This change would allow law enforcement to make arrest at the scene of a crash for a violation of chapter 320, Florida Statutes.	Chapter 320, Florida Statutes, provides for the lawful issuance of vehicle license plates and registrations. Vehicle license plates and registrations are required for the lawful use of a vehicle on Florida roadways therefore, providing this authority for chapter 320 would prove to be consistent.	None.	s. 316.645
Blood Draws	Current law requires officers to establish probable cause for both driving under the influence and causation of an accident involving death or serious bodily injury, prior to requiring a driver to submit to a mandatory blood test under s. 316.1933(1), Florida Statutes.	This change would provide that officers are to use "reasonable suspicion" when determining if a driver was both in physical control of a vehicle and under the influence when he/she is involved in a crash which resulted in death or serious bodily injury.	These amendments will allow law enforcement officers to secure additional evidence of blood alcohol content that should assists prosecutors in filing appropriate criminal charges in those crashes involving death or serious bodily injury.	None.	s. 316.1933

Issue	Current Situation	Proposed Change	Justification	Fiscal Impact	Statutes to be Amended
Ignition Interlock Devices	If a driver is convicted of a DUI in Florida the driver can be mandated to install an ignition interlock device (IID) on all motor vehicles that they would regularly be driving. This mandate can either be a judicial requirement by the court or an administrative requirement by the department.	The proposed changes would lower the cut point of the IID to a BAC of .025, require mandatory treatment completion as required by the treatment agency following a third or subsequent IID lockout, and increase by one month the required IID time for a third or subsequent violation.	The proposed changes are necessary to tighten up the loop holes that were in the initial IID laws and process. The BAC cut off of .05 still allows the person to continue drinking but at a low level, the change to .025 eliminates the possibility of the IID driver having even one drink and being able to attempt to start their motor vehicle. The treatment requirement for multiple violations of the IID is in response to a problem drinker still drinking and then driving or attempting to drive. The increase in time that the IID is required will protect the general driving population from a recovering drug abuser during the recovery period.	None.	ss. 316.1937, 322.2715, and 322.291
Traffic Citations	Currently, Florida law provides for the collection of a fingerprint on a uniform traffic citation by law enforcement when making a traffic stop when the individual does not posses proof of their identity.	This change would allow for the electronic collection of more than one print as needed to determine the identity of the driver.	Clarification is needed to allow for the electronic collection of more than a single print.	None.	s. 322.15
Victim Assistance	Current law provides access to funds for victims of certain crimes through the Victim Compensation Act. While the list of crimes does include vehicular homicide in the first degree, it excludes vehicular homicide of the second degree.	This proposal would allow all families who are victims of vehicular homicide to seek compensation regardless of whether the offender is charged with a crime of the first degree or second degree.	This change would provide consistency for those families who are affected by vehicular homicide. In 2006 there were 35 citations issued for vehicular homicide in total.	Indeterminate.	s. 960.03

Issue	Current Situation	Proposed Change	Justification	Fiscal Impact	Statutes to be Amended
Motor Carrier Compliance	Florida based motor carriers operating in interstate commerce currently register under the International Registration Plan (IRP). While various documents, including insurance and proof of paying the Heavy Vehicle Use Tax, are reviewed as part of the registration process, the carrier's safety fitness record is not checked prior to issuing the registration credentials. This could allow motor carriers currently under Out of Service orders for safety issues to continue to receive valid registrations	This proposal would provide authority for the department to participate in the Performance and Registration Information System management Program whereby carriers under an Out of Service order will have their vehicle registrations cancelled.	Participation in this program will allow the department in conjunction with our partners in highway safety, to assist in removing unsafe motor carriers from our roadways by suspending their vehicle registrations.	A federal grant request for \$750,000 has been approved for programmatic changes pending enactment of this proposal.	s. 320.0715
Definitions	Currently, Florida law does not recognize the term "electronic title," nor does it encompass new vehicles in the market place.	Create a new definition for electronic title, modify the definition of motorcycle and make a technical correction to the definition of judgment.	Terms defined in Florida law associated with motor vehicle titling and registration have not kept pace with changes in technology and the market place.	None.	ss. 319.001, 320.01, and 324.021

ATTACHMENT 4

FLORIDA DEPARTMENT OF HIGHWAY SAFETY AND MOTOR VEHICLES

1ST QUARTER PERFORMANCE REPORT FISCAL YEAR 2007- 2008

PROVIDING HIGHWAY SAFETY AND SECURITY
THROUGH EXCELLENCE IN SERVICE, EDUCATION, AND ENFORCEMENT

Our Vision is... A Safer Florida!

Miami Aggressive Driving Campaign Successful - From July 10 - 12, members of the FHP conducted an

aggressive driving crackdown in Miami-Dade and Hillsborough Counties. The campaign was launched due to a growing concern over aggressive drivers in the Miami and Tampa areas. This effort was part of a long-term traffic safety campaign that focuses on traffic themes to help reduce deaths and injuries on Florida's roadways. The FHP used unmarked and marked vehicles to conduct the two unannounced operations. Enforcement totals from the 3-day operations in Miami-

Dade and Hillsborough Counties included nearly 1,000 arrests and over 200 aggressive driving citations.

<u>Labor Day Crack Down</u> - FHP was out in force during the Labor Day holiday weekend. Each year, thousands of

lives are cut short or changed forever in alcohol-related crashes. In an effort to prevent such tragedies, Florida Troopers conducted enhanced patrols throughout the state during Labor Day weekend, specifically targeting DUI violators. During this year's 96-hour holiday period, 23 people were killed in 20 accidents investigated by FHP. During this period, troopers charged 178 people with driving under the influence; issued 7,742 speeding citations; issued 1,301 seatbelt and child

restraint citations; and assisted 3,165 motorists on Florida's highways.

New Teen Driving Guide Now Available - On July 17th, the Coral Reef Driver License Office hosted a community

outreach and media event to promote safe teen driving. The new Driving Guide for Teens and Parents was unveiled at the event and safety demonstrations were conducted emphasizing seat belt use and the dangers of impaired driving. The new Guide, which is provided to all teens when they receive their learner's permit, contains important information about the state's traffic laws and restrictions, as well as a special skills mastery checklist and driving log. The Guide is also available online. Since traffic fatalities are the number one cause of death for teens nationwide, the

Department continues to stress the importance of developing good driving skills and observing traffic laws and common sense safety techniques among Florida's teen drivers.

E-Titles Cut Costs and Help Prevent Fraud - The initial phase of the electronic title process (E-Title) was implemented August 15, and is expected to greatly simplify the auto titling process while providing a cost savings. The new E-Titles will: eliminate duplicate titles where instances of fraud are more common; reduce the number of lost and returned unclaimed titles; and reduce fraud associated with stolen title certificates, forged signatures, and alteration of odometer miles. The new process will still allow a customer to request a paper title be printed at any time at no charge through

the Department's website. Through this electronic process the Department will continue to reduce costs associated with form usage and mailings and improve customer protection in the sale of vehicles.

5 Star FLOW Mobile Tour - The Florida Licensing On Wheels (FLOW) mobile units continue to be present at

community and special events around the state. The vehicles are equipped with the technology to bring valuable Department services right to the customers. These units not only bring a convenient method for customers to obtain driver license and tag services, but offer information on the newest safety initiatives and campaigns. On August 13, five FLOW mobiles traveled in different directions throughout the state over the week and ended in five different locations. The

FLOW Five Star Tour was a cooperative effort between the Department, the American Automobile Association (AAA), and law enforcement. Stops included city and county agencies, hospitals, libraries, assisted living centers, and businesses. During the first quarter nearly 13,000 customers were provided direct driver license services through the FLOW Mobiles.

FHP Receives High Marks From On-Site Accreditation Team - FHP was originally accredited by the Commission on Accreditation for Law Enforcement Agencies (CALEA) in November 1996. Since then, a team of assessors from CALEA has visited the agency to conduct assessments that verify continued compliance in order to maintain certification. On August 23, the CALEA team concluded their assessment, once again giving FHP high marks in a number of areas. Following the examination of the

agency's policies and procedures, management, operations, and support services, the team of assessors reconfirmed that FHP continues to comply with all applicable standards. Verification by the team that FHP meets the Commission's state-of-the-art standards is part of a voluntary accreditation process – a highly prized recognition of law enforcement professional excellence.

PERFORMANCE EXPLANATION

¹ <u>Number of duty hours spent on professional compliance investigations</u> - The number is inordinately high during this quarter based on protracted cases involving a great deal of investigative hours to complete. In addition, a team approach to professional compliance investigations has also increased the number of hours reported.

² <u>Number of mobile homes inspected</u> - The decrease in inspections is due to a corresponding decrease in manufacturing production. Members of the mobile home inspection team are meeting all inspection requirements.

³ Number of rebuilt salvage motor vehicles inspected for vehicle identification number and odometer readings - The reduction in the number of rebuilt/salvage inspections is a byproduct of the decrease in consumer demand for inspections. In addition, the standard for this fiscal year is inflated due to the previous increase in inspection activity associated with prior hurricanes in 2004 and 2005. The FY 2008-09 standard will be addressed to better correspond to current market conditions.

⁴ <u>Number of automobile dealers licensed</u> - The reduction in the number of dealers licensed is due to nationwide economic conditions associated with the manufacture and sales of vehicles which has negatively impacted or reduced the number of licensed dealers.

PURCHASES MADE IN EXCESS OF \$100,000 AND NOT IN CONJUNCTION WITH STATE CONTRACTS JULY through SEPTEMBER 2007

ITEM(S) PURCHASED	VENDOR	AMOUNT
ISA License Fee for IBM Mainframe Software Products, Term 7/01/07 through 6/30/08, Single Source, KDC067-562, DO# 557234.	IBM Corporation Tallahassee, FL	\$320,628.00
